Engineered with exclusive Bose Unify technology, this system uses easy-to-follow onscreen messages to guide you through the setup process. It even verifies when you've made the correct connections. Enjoy up to 6 HD video and audio sources such as your Blu-ray Disc player, cable box and gaming system. And now, its designed to let you enjoy the experience more easily than ever before. Simplicity of setup and programming through the Unify Intelligent Integration System and LCD remote. Easy to Set Up. Easy to Use.

The Lifestyle V25 system features the new Unify Intelligent Integration System to walk you through system setup, step by step. As you're attaching components to the control console, the system recommends the best connectors via onscreen messages. It even confirms that the connection was made properly. Each connected device is automatically added to the source menu accessed on your TV screen. No more toggling through video inputs to find the right source. This makes it easy and intuitive for anyone to use the Unify system. Unify technology also simplifies programming your Bose remote to control your Lifestyle system and most anything attached to it. During setup, the Unify system references an internal database to identify each connected component, and automatically teaches the Bose remote to control it. And Once You're Set Up. They produce a level of sound that adds impact and realism to your entertainment. That sound is aided by an Acoustimass module that can be placed in a corner or out of view. Exclusive technology in the module helps provide the emotional intensity you feel at the theater or in a concert hall. Even hidden out of sight, its impact can't be missed. Sound Designed for Your Room Your room is unique, with size, shape, textures and other elements affecting the sound you hear. In addition, built-in Bose link technology can distribute the home theater systems audio to as many as four additional areas. Add compatible Bose products to enjoy music almost anywhere, even outdoors. Key Features Quality multi-speaker Bose system 5-speaker surround sound system designed for use with your home entertainment components. Unify intelligent integration system uses onscreen navigation to simplify system setup and everyday use. This proprietary technology walks you through setup, showing the right inputs and best connection options, and even verifies you've done it correctly. Clear, onscreen menus provide all the information you need for your connected sources.

ADAPTiQ audio calibration system provides greater freedom of speaker placement. It analyzes the way your room's dimensions and other variables affect sound, then automatically adjusts the sound of your Lifestyle surround sound system to the acoustics of your room. Up to 6 HD sources, including 4

HDMI and 2 audio HD sources. Bose remote features fewer buttons and an LED screen to simplify management of your entertainment sources. Works on radio frequency to operate through walls and floors. It charges your iPod while docked, and your Bose remote can control your iPod content. You can also play its video content on your HDTV. Acoustimass module works in concert with the small speakers to deliver a fuller range of theater sound and effects. The patented Bose design produces low frequencies for all channels with no audible distortion. Automatic video upscaling ensures movies and sports use the highest resolution capabilities of your display up to 1080p over HDMI. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Major 4.0 out of 5 stars I personally own a surround sound that I pieced each part separately. My speakers are big, bulky and for the same price my system is better than this Bose. But that's not the point of BOSE. I bought this for my dad. Not a tech savvy guy AT ALL. Loses 1 star because the price. The Bose system is much better and has excellent sound. I also bought the SL2 surround link so I wouldn't have to have wires for my rear speakers; this is a great feature and I would highly recommend it. Before buying the system, I read many reviews, read all the Bose online information and called Bose. I verified that the only difference between the V25 and the V35 is the physical size of the speakers.

So, if you're considering the Bose lifestyle, don't waste time looking at the V35 system unless you've got more money than you know what to do with. However, where you could spend that money you saved on a V35 might be for a preamp, for a turntable. I still have a very nice turntable and many vinyls, which I want to use through my Bose. You can't connect a turntable to your Bose system without a preamp; so, you have to call Bose and order one through them. Just thought I'd point this out because it was not obvious to me when I bought the system. I only realized it when I tried to hook it up. I'm an engineer, with a strong electronics background; however, it took me about 4 hours. I should add that I had to put together front speaker stands and rear speaker bookshelf stands, which did take extra time. It also takes time to undo your existing system and rerun cables, etc. Then there's running the Adaptiq, and adding each component. And, you need time to try various positions for the reflective speakers so you can get the best sound. So, plan on a whole afternoon or evening. As for setup, I quickly ran out of inputs on the Bose system 5 on the back. Probably because I have some older components I want to use, such as a VCR and CD changer. So, if you use a digital optical cable from your TV to your Bose, you can overcome the limitation. For instance, I hooked my VCR straight to my TV, and I hooked my DVD player straight to my TV. You only have to select the correct input on your TV for whatever component you want to use. As for the Bose remote, I don't use it. It will not work correctly with older components, and even with some newer ones. You use the setup process with the Bose, and it is supposed to figure out what your component is, and how to control it, by you pressing various buttons on your old remote in response to the Bose setup guide. It usually gets the basic ones such as volume, power and channel, but not always the others.

Would be nice if you could just input your specific component and the Bose would know how to control it, but it doesn't work that way. So, I continue to use my Logitech Harmony One remote, which works great and controls all my components as well as the Bose. So, you might want to consider this if you have any older components, or you want a remote that will truly control everything. The Bose surround works great, and the rear speakers are picking up much more than my old system did. Also, I can turn it up to earsplitting and there's no distortion. Overall, an excellent system and I'm very happy with it. I highly recommend it. I wish it was offered in white black is the only option. It is expensive when compared to other systems, but we have always had good luck with Bose products. I wish that the remote worked better with the Apple TV. I still have to use the Apple remote to turn on the Apple TV. The Bose remote won't turn it on. The Bose remote does turn on all of my other components. Have listened to system in stores many times over the last few years. Figured

the store setups optimized the sound and it would never work in real life. Boy was I wrong. Can't say enough about the sound, ease of use and overall value. Setup was so simple. On screen step by step instructions for every device I added. Have connected to it, TV, Cable Box, Home Network streaming device, BluRay 3d player, CD Changer, and IPOD. The Bose remote works all of the devices when selected. So glad I finally made the purchase. It is not the first Bose we have had this problem with. Thought they would have fixed that by now. Otherwise, I just love Bose products great sound. Click here for more information on the types of cookies we use and how to change your cookie settings. The first thing you notice is the beautiful design. Then you turn it on, and powerful audio pours from our redesigned Jewel Cube speakers. If you want great performance—and value—in a Bose surround sound system, you'll find that the Lifestyle 600 home entertainment system delivers on those expectations. And with SoundTouch included, it goes well beyond traditional home cinema. For movies, TV, sports and music, it's a great choice to keep everyone fully entertained. Precisely angled drivers within each enclosure reproduce a blend of direct and reflected sound for greater spaciousness and no "sweet spots". Sit anywhere you like—you'll experience an immersive audio experience that adds depth and drama to whatever you watch. And when it's time to relax with a favourite playlist, you'll appreciate the clarity and fullness of your music. Its horizontal design fits in well with your TV, with a small footprint that makes it easy to place. The Lifestyle 600 system is more than its Jewel Cube speakers. You also get resounding bass performance for movies and music from a wireless Acoustimass module. With its premium glass top finish, it delivers on sound and style. A powerful driver and QuietPort technology combine for best in class performance for its size. And it's all controlled with a universal remote. Which is right for you Of course, there's the premium home cinema performance that you'll love for movies, TV and sports. But when it comes to enjoying your music, you can listen whichever way you want, without worrying about which technology is best. This system features SoundTouch, which lets you play music through your WiFi network for instant in home listening. SoundTouch lets you take total control of your listening experience, right from your smartphone or tablet.

Easily personalise presets for onetouch access to the music you love and control one or many SoundTouch speakers around your home. Without lifting a finger. Just open the Alexa app. Search for "Bose" under the Skills menu. Then follow the simple onetime setup. So, what can you do Plenty. Start your funk playlist in the kitchen. Turn the volume up or down. Change tracks. Find out what's playing. And even control where it's playing—from the speaker in your kitchen to the speaker in your bedroom. So when you hear it, you hear it at its absolute best. The rear speakers and bass module even connect wirelessly for easier placement. I already having Bose Cinemate 520 in another room. Before buying I had 3 options evaluated Opt1 Bose Acoustimass 10 with Marantz SR5014 which will help expanding to ATMOS later, Opt2 Bose Soundbar 700 complete set and Opt3 Bose Lifestyle 600. Since I needed multiple connectivity requirement like TV, FireStick, PS4 etc. Bose Soundbar 700 gone out of my view, I hate depending on TV for the rest of the connectivity. Its a stretch budget for me compared to other 2 option, but absolutely Im not concerned now !! I feel I made the right choice, again music is subjective to each one of us. The sound is so clear and crisp. Bass module adds up to the system with its thundering effect that makes you love the performance of this system. Watching movies with this system has made me addicted to it. My room is now my theatre and i just love it. Entertainment systems use the SoundTouch app; while the Bose Home Speaker family uses the Bose Music app. However, Apple device owners can use Apple AirPlay 2 to group the entertainment system with Bose Home Speaker family products for multiroom synchronised playback. Apple AirPlay 2 requires a WiFi connection. As you're connecting

components to the control console, the system recommends the best connectors via messages on the screen. It even confirms that the connection has been made properly.

The bass, treble, centre and surround levels can be adjusted using the universal remote control. The module should not be placed on a shelf or table. The rear speakers connect wirelessly using the wireless connectors. The connectors have a range of about 10 m 32 ft and connect via a proprietary 2.4GHz radio. From there, you can select one of your presets or browse the Recents list. The buttons marked 1 to 6 on the remote control will also play a preset once the system is turned on and the SoundTouch source is selected. It does not stream Internet video sources or videos stored on a computer. For this, you would need to use a streaming device such as Apple TV or Roku. For example, say "Alexa, play my jazz playlist in the Kitchen", and the playlist will begin to play on the SoundTouch speaker named "Kitchen". You can also control the music that's playing—for example, say "Alexa, pause the music in the Kitchen", "Alexa, resume the music in the Kitchen", "Alexa, turn up the volume in the Kitchen", "Alexa, skip to the next song in the Kitchen" and so on. However, you can still create groups in the SoundTouch app as normal, even if the music was started through the Bose Skill. For example, "Alexa, ask Bose to play Preset 1". Play content in a specific room. For example, "Alexa, ask Bose to play Preset 1 in the Living Room". For example, "Alexa, ask Bose to pause". Adjust volume. For example, "Alexa, ask Bose to turn this up". Play the same music everywhere. For example, "Alexa, ask Bose to turn this up". Find out what's playing. For example, "Alexa, ask Bose what's playing". Turn a system on or off. For example, "Alexa, ask Bose to turn off". The Skill itself is free, and it is enabled through the Skills section of the Amazon Alexa app. An Alexa-enabled device like an Amazon Echo or Echo Dot is also required to use the Skill. Beautys in the eye—and ear—of the beholder. So we designed the Lifestyle 650 home entertainment system to be beautiful in every way. Acoustics.

Aesthetics. Craftsmanship. Simplicity. For your movies and music, its the most uncompromising 5speaker home cinema system weve ever made. With OmniJewel satellite speakers—even smaller than our Jewel Cube speakers, which are also available for this system—were rewriting that history with a new chapter on elegance. Each of these tiny speakers features a carefully milled aluminium housing with two acoustic enclosures for dualopposing drivers. This is the key to creating our first omnidirectional speaker for true 360degree sound and a more spacious home cinema experience. It took a team of 30 people to perfect every last detail, ensuring the acoustics would work with the aesthetics. And the rear speakers Wireless. Its packed with five precision speakers and coated in an anodised aluminium finish. Of course you want that resounding bass performance for movies and music. But you dont want a monstrous piece of equipment to enable it. But it's more than just good looks. And it's all controlled with a universal remote. Which is right for you Of course, there's the premium home cinema performance that you'll love for movies, TV and sports. This system features SoundTouch, which lets you play music through your WiFi network for instant inhome listening. SoundTouch lets you take total control of your listening experience, right from your smartphone or tablet. The rear speakers and bass module even connect wirelessly for easier placement. BOSE has always made a great, quality product. Will be expanding sound system at home with BOSE products Entertainment systems use the SoundTouch app; while the Bose Home Speaker family uses the Bose Music app. For this, you would need to use a streaming device such as Apple TV or Roku. You can also control the music that's playing—for example, say "Alexa, pause the music in the Kitchen", "Alexa, resume the music in the Kitchen", "Alexa, turn up the volume in the Kitchen", "Alexa, skip to the next song in the Kitchen" and so on.

However, you can still create groups in the Soundtouch app as normal, even if the music was started through the Bose Skill. For example, "Alexa, ask Bose to play Preset 1".
