Showline's SL BAR has libraries for all cell modes. I tried to use copy to ColorForce II 72, but I can not modify the library It can not be edited by copying to the desired cell mode. We hope this equipment will be permanently added to the next library. I was able to delete a parameter and have it clear from the list. Which parameter in which fixture were you trying to remove. I agree there appears to be some issue with renumbering. I will continue to investigate this and get it reported as a bug so it can be fixed in a future release. Thank you, Thank you, The update certainly provides us with a more comfortable operating system. However, I could not making the Lamp Control parameter when creating a new library. It was created normally in 2.6.4, but not in 2.7. I am downgrade the SW every time I modify or create a library. I hope that these points are complemented. Thank you, JJ. The 1044 creates stunning effects and offers exceptional color clarity from its vast LED color palette and is ideal for touring, television and theatre applications. IP20 rated, UL approved product available, outstanding longevity, very low power consumption and can be floor or truss mounted. Ideal for lighting stages, theatrical sets, television and architecture. Unlimited continuous on and continuous strobe operation. Quickconnect system enables luminaires to be joined together side to side and top to bottom. The tightly packed array of over 1300 high power LEDs ensures maximum output and fullfield, even distribution across a wide beam. This warm or cool white ERSstyle fixture boasts extremely smooth dimming down to the very bottom of the curve as well as a flat and even field of light for superior gobo projection. Using ETC's exclusive RGBL color system, the ColorSource PAR emits a far more vibrant, vivid light to other comparable LED wash lights.

These mighty, stageready fixtures integrate channels of red, green, blue, amber, and white LED sources to attain greater color accuracy and an increased color palette. Its temporary outdoorrated robust housing repels water, snow, dirt, and sand for allweather applications and is available in black or white. Powerful Cree LEDs partnered with a flexible software system generate stunning pixel mapping effects. Well assume youre ok with this, but you can optout if you wish. ETC Source Four 750 5,10,14, 19,26,36,50,70 and 90 Degree lens plus 19,26,36 and 50 EDLT and 50 Degree

LED lens. Lux 19 7020 Lux 26 4960 Lux 36 2610 Lux 50 1190\ Weight with lens 23 lbs Accepts industry standard accessories ELATION PRO PLATINUM SPOT 5R Moving Head PAR 64 and Par 38 LS mega clamp or on floor base. Data Terminators 5 pin and 4 pin. Yellow Jacket Cable Mats Followspots. Chroma Q Jr FX rotators to fit Source Four Jr. Standard and Custom gel strings.Theatrical and Production. Optimized for an ultrahigh TLCI, a very high CRI and peak brightness, colors as well as Hue, Saturation and Intensity can be set directly on the tube. With four powerful homogenised cells per foot, these units can be grouped and controlled to release your creativity. In addition, the RGBA LED engines provide a radically increased colour palette, together with a high CRI of 92 and theatrical grade dimming, all in the same fixture. The XC5 colour strobe utilises 1,080 RGB LEDs, boasting just 4A power consumption with 6W standby power and a lamp life of 50,000 hours. The combination of COB emitters and a clever reflector design yields a striking, diffused light richly drenched in saturated hues. Weight 37kg Pixel Line 1044 List Hire Price 40 PixelLine 1044 is a RGB linear batten featuring 1044 highintensity LEDs. A lighting designer's favourite, the 1044 creates stunning effects and offers exceptional colour clarity from its vast LED colour palette.

See your browsers documentation for specific instructions. Are you sure you want to switch accounts Perfect for a wide range of cyclorama, flood and wall washing applications where a powerful throw is needed. Available in 6 ft, 4 ft, 1 ft versions, these fixtures are specifically designed to fit in flight cases used with the original Color Force. Key Features Homogenized RGBA color mixing. High CRI of 92. Theatrical grade dimming. Rugged extruded aluminium body. Builtin power supply. ChromaQ calibration means superior fixturetofixture consistency. Works great in any theatre, TV, concert touring, exhibitions or corporate event. Optional internal LumenRadio. Touchscreen user interface. Includes Floor trunnions and 3 foot True1 to Male Edison cordset. Something went wrong. Cancel Thanks, well look into this. All Rights Reserved. User Agreement, Privacy, Cookies and AdChoice Norton Secured powered by Verisign. This allinone LED luminaire features pixelmapping control,

longthrow capabilities with native 10. It is a wash light, a strobe, and a blinder in a lightweight and robust design a must-have multipurpose LED fixture. Maintaining the SGM design philosophy, the P2 shares some of the key features of the P5, like color calibration, interchangeable lenses, smooth seamless beam projection, low power consumption, and RMX DMX addressing. The P2 further offers the benefits of three-segment pixel mapping control. Because of its efficiency, small size, and easy rigging options, the P2 is a must-have wash for any rental company, touring production, corporate event, or temporary installation. The compact, detailed design, allows end-to-end placement on stage or truss, maintaining equal spacing between pixels. An embedded Ethernet switch and wide range of protocols sACN, ArtNet or KlingNet allow a quick network installation and ease of control from media servers, DMX or the internal effects engine. Up to an amazing 52,000 Lumens!

SkyPanel puts out a tremendous amount of light, in a soft and uniform beam field. Brighter than a 2 kW tungsten soft light or a 6 kW tungsten space light, the SkyPanel S60 has more than enough light for most applications. At the same time, the lamphead is able to perform beautifully at lower light levels. This range of illumination and color gives users an unprecedented amount of control. Other features include an onboard battery input for mobile applications, LAN port for network connectivity, USB port for firmware updates via thumb drive, and many more. It carries the functionalities of a wash light, a strobe light, a flood light, a pixel light, and a directview blinder with a nonfading continuous output, making it the perfect multipurpose LED fixture. It features a narrow native beam angle that can be modified through various optional magnetic and click-on accessory solutions such as holographic filters. Together with IP65 rating, a high output of 28,000 lumens and having a small physical footprint the Q7 is an ideal fixture for outdoor use to light up buildings, facades, architectural structures and attractions. Combined with a small footprint, the power consumption is reduced to just 420W while the LED source life expectancy is 50,000 hours. This luminaire takes the popular P5 as its design base to provide an architectural tunable white wash, offering the same mechanics and SMPS control as the P5. Setup is via an OLED graphic 5-button display. Unsightly colour shadowing is eliminated with this innovative optical system that gives power enough to light nearly 12m of cyclorama. Perfect for a wide range of cyclorama, flood and wall washing applications where a powerful throw is needed. In addition, the RGBA LED engines provide a radically increased colour palette, together with a high CRI of 92 and theatrical grade dimming, all in the same fixture.

CCT tuneable between 2,800K and 6,500K, and natively single source, the diffuse nature of its output negates the need for silks or skirts. The light source is a strip of powerful white LEDs, which perfectly emulate a bright Xenon linear lamp. The flash effect is actually enhanced since the Stormy is equipped with a parabolic reflector, like a classic strobe, and does not project the light directly forwards like other LED strobes do. The frequency, duration and intensity of the pulse are fully digitally controlled, and these parameters are even independently adjustable. Thanks to its highly sophisticated electronics, the light turns on and off instantly, creating the jerky movement illusion. Thanks to the use of LEDs, the light intensity remains absolutely constant, without flickering effect. The Stormy also comes with RGBW LEDs, which are able to flash in any color there is no more need for gels, which dramatically reduce the amount of light, or slow noisy unreliable scrollers. It is equal to the Sunstrip Active however this version offers you some extra features such as invert function, opportunity to change the logo in the display into your company name, protection function for the mode button and fast addressing. The Sunstrip Active MKII has four DMX modes 1 channel, 2 channel, 5 channel and 10 channel. For standalone applications, the Sunstrip Active MKII is equipped with 16 built-in patterns as well as a manual dimmer. With its Neutrik Powercon in and output the Sunstrip is suitable for the most demanding users on the road. Equipped with the Shimano's new electronic GRX815 Di2 shifting, this is a gravel bike of the highest calibre. That's why we've equipped the Grail CF SL 8 eTap with SRAM's reliable and accurate Force eTap AXS groupset. With no cables and seamless shifting you won't think twice about tearing through tough terrain. Agile handling over tough terrain and stability at speed, this Grail is ready for all adventures short or long, solo or with friends. Equipped with Shimano's GRX800 groupset designed especially for gravel riding, the Grail CF SL 8 provides topshelf reliability at an unbeatable value. Now's the time to get out and rack up the kilometres on the road or off it. Hydraulic disc brakes and Shimano's new accurate and reliable 1x11 GRX600 groupset let you focus on what's important riding off the beaten path. And the GrailON CF 8 is ready for them all. With its powerful motor, big battery reserves, innovative design, and range of highend features, this is an agile, powerful gravel machine with an extra kick! And thanks to powerful motorised support, you can do more of the riding you love than ever before. With advanced ergonomics and impressive allround performance, take your offgrid adventures to the next level. The Grail AL 6.

0 is equipped with a full carbon fork and Shimano's GRX400 gravel groupset. The Grail CF SL 7.0 is our base carbon model and comes complete with Shimano's new GRX600 gravel groupset. With a women's specific saddle and Shimano's new GRX600 gravel groupset backing you up, go out and rack up the big kilometres. The Grail AL 6.0 is equipped with a full carbon fork and Shimano's GRX400 gravel groupset. Experience the point where speed meets versatility, pack up and take the bike out into the wilds for weekend escapes. Comfortable and reliably equipped, the Grail AL 6.0 is hungry for new experiences. Bit Set, Assembly Paste These are in general road racing bicycles with racing handlebars or straight handlebars, triathlon or time trial bicycles. The permissible maximum overall weight comprising rider, luggage and bicycle should not exceed 120 kg. Under certain circumstances, this permissible maximum weight can be further limited by the component manufacturers' recommendations for use. In addition, these bikes are also suitable for gravel paths and offroad trails where a short loss of tire contact with the ground due to small stairs or steps at a height of 15 to 20 cm can occur. Canyon products are exclusively available at Canyon.com, so you can trust the quality you are getting. Errors and omissions excepted. The Grail CF SL 7.0 is our base carbon model and comes complete with Shimano's new GRX600 gravel groupset. Our Gravel Pro Geometry combines outstanding stability with agility and

works in harmony with the striking CP07 Gravel Cockpit for control across a range of terrain and comfort for the long haul. Shimano's new GRX600 groupset provides gravel-optimized shifting and braking performance. This saddle will keep you feeling fresh over any terrain, even when the distance starts clocking up. Bit Set, Assembly Paste These are in general road racing bicycles with racing handlebars or straight handlebars, triathlon or time trial bicycles. The Force II 12 features four large RGBA LED lens engines that are powerful enough to light a large cyclorama with seamless color blending. The Color Force II 12 replaces the multiple LEDs of its predecessor with four large RGBA LED engines with lenses that fit within the same fixture size. The homogenized lenses put out a single light beam that smoothly blends colors and prevents shadowing. It can be controlled in standalone mode, via DMX512 in wired mode, or via optional LumenRadio CRMX management. The settings are controlled by an LCD touchscreen on the back of the unit. You can select different effects modes such as flip, strobe, strobe on top, or random to either all four or individual LED engines. The fixture comes with a tiltable yoke mount, a power cord, and a safety chain for rigging. Homogenized Color Output The Color Force II 12 output is a single, clean beam of light, delivering a superior color blend with no color mixing shadows.

The homogenized optics and improved ChromaQ technology provide even higher quality saturates and pastels and a purer white from a single source. Theatrical Grade Dimming Theatrical grade dimming emulates the extremely smooth dimming curve of tungsten fixtures. Color Consistency Factory calibration ensures all Color Force II units are color matched, so side-by-side they will be outputting consistently the same color, unit to unit, regardless of the batch of LEDs used or when the unit was manufactured. Creative Control All Color Force II models provide creative control with independently controllable cells every three inches. Brighter The Color Force II units deliver at least 50% more output compared to their predecessors, and they are now capable of lighting up to a 39 cyclorama with the 72 model or surface.
